

## Energy Rates

### Duck River Electric Membership Corporation

Rate schedule effective April 1, 2008

#### RESIDENTIAL

Customer Charge	\$11.43
Energy Charge (kWh):	
Base Rate:	
First 1000 kWh	\$0.07824
Additional kWh	\$0.06748
Environmental *	\$0.00303
FCA ( Fuel Cost Adjustment) **	\$0.00587

#### GENERAL POWER 1 (GSA 1)

Customer Charge	\$13.99
Energy Charge (kWh):	
Base Rate:	
All kWh	\$0.08137
Environmental *	\$0.00351
FCA (Fuel Cost Adjustment) **	\$0.00578

To determine the total per kWh charge, the base rate, the environmental and the FCA should be added together. To determine an estimated monthly bill, the estimated number of kWh's should be multiplied by this total kWh charge and the customer charge should be added to this amount.

Energy Rates for power users with a demand greater than 50 KW are much more complex and have many more variables than those published here. Should you need information about rates for energy loads greater than 50 KW, contact your local Duck River Electric office or e-mail [corpinfo@dremc.com](mailto:corpinfo@dremc.com) with your request.

\*Environmental - Each month the Tennessee Valley Authority adds a per kilowatthour charge to cover costs associated with TVA making environmental improvements and additions to existing generating facilities to meet current requirements mandated by the Environmental Protection Agency. These charges are collected by Duck River Electric and passed directly to TVA.

\*\*FCA (Fuel Cost Adjustment) - TVA calculates and applies the FCA *quarterly* and adds a per kilowatthour charge monthly to recover generating fuel costs when those costs exceed the amount budgeted. The FCA can fluctuate up or down depending on how actual fuel costs compare to TVA's projected expenditures.
