

PAY WHAT YOU WANT, WHEN YOU WANT.

What if paying your electric bill was like buying gas for your vehicle? Now, it can be. Duck River EMC introduces PowerUP Prepay, a prepay energy solution.

With PowerUp you can

- Choose your own payment schedule
- Purchase electricity when convenient
- Monitor electrical usage
- Customize the plan that is best for you

PowerUP

Duck River EMC's Prepay Program

THINK OF POWERUP PREPAY AS PUTTING GAS IN YOUR CAR

WHAT IS PREPAY BILLING?

With PowerUP Prepay, you pay for electricity how and when you choose. Purchasing electricity before you use it allows you to control your budget and pay how much you want, when you want. Instead of a monthly billing statement, your usage and balance are calculated daily. Track your usage through Duck River EMC's mobile application.

HOW DOES IT WORK?

You purchase electricity before you use it. Payment can be made when you decide, and you manage your account. You can pay online, over the phone 24/7 or in person during regular business hours at your local Duck River EMC office. When your account runs low, you will get an alert by text or email letting you know that it's time to recharge your account.

WHAT IF MY ACCOUNT RUNS OUT?

If funds in your account run out, electrical service will be disconnected. You will be notified that service will be disconnected if you don't recharge your account. You can purchase more power by paying online, calling or visiting your local Duck River EMC office.

WHO CAN PARTICIPATE?

PowerUP Prepay is open to some Duck River EMC residential members, contingent on cell signal strength at the meter location.

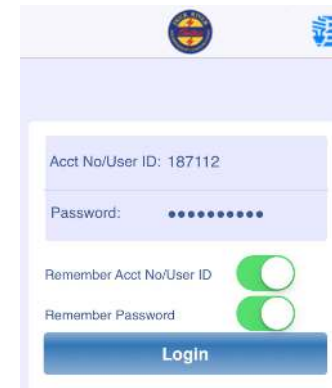

By monitoring energy use and adjusting habits and appliance operation, you can reduce the amount of electricity you use each day and save money.

The Duck River EMC mobile application can be used by all DREMC members. Those with a PowerUP Prepay account can:

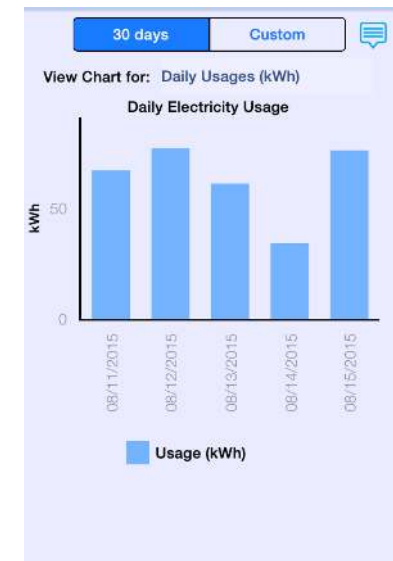

- Monitor daily usage
- Check account balances
- See daily temperature statistics and how extreme temperatures can result in high energy use

The feature on the mobile application allows you to view detailed energy usage history that shows daily high and low temperature, daily kWh use, and your estimated power cost for each day.

You may also review detailed energy information through the online bill payment portal.

Visit www.dremc.com for more information regarding the mobile app.

Click "Usage Graphics" to track your usage through the mobile application.

THE POWER IS IN YOUR HANDS.
