

## New Homes Guidelines/Suggestions for Duck River Electric Members

Changing June 1, 2017

### New Homes Program

*(Restrictions apply)*

Cash incentives are available to DREMC customers that build an all electric new home. Each home is rated on the HERS system (Home Energy Rating System) with the incentive varying according to the efficiency of the heat pump system installed and how well the home is insulated. (The smaller the rating number the higher the incentive) We will work with homes on an individual basis and will give members information on weatherization and heat pump improvements that will increase the home's energy efficiency. Insulation requirements are R-45 attic, minimum R-13 wall insulation, mastic tape on duct work, **no regular duct tape**. Minimum SEER rating on today's market for heat pump is 15, **but the higher the SEER rating the more energy efficient** with geo-thermal being the most efficient.

Rebates are available as follows:

<b>Classification</b>	<b>Incentive</b>
<i>energy right</i> ® (ER Rated 93 to 86 or approved equivalent)	\$ 500
<i>energy right</i> ® Platinum (ER Rated 85 or less or approved equivalent)	\$ 600
Energy Star ® with "certified HERS Rating V2.5 - V2.9	\$ 900
Energy Star ® with "certified HERS Rating V3.0	\$ 2,000

\* For each classification with an Advanced Water Heater and additional \$ 100

\*Must be an **All Electric** New Home to qualify

\*Advanced/Lifetime warranty water heater is not designated as an **Instantaneous Water Heater**

**Instantaneous Water Heaters do not qualify**
