

A Touchstone Energy® Cooperative 

Building a new home? Make sure it's energy efficient!

REBATES AVAILABLE

1/2018

Helping you get the most from your energy dollars

CONGRATULATIONS ON YOUR NEW HOME!

Duck River Electric Membership Corporation is excited to offer you our New Homes Program! If you qualify, this program is designed to give homebuilders rebates for properly installed, efficient electric or dual fuel heating and cooling units and energy-efficient water heaters*.

Homes that qualify for our Platinum Package are better insulated and sealed, saving the homeowner money on energy costs and creating more comfort for your family.

PLATINUM PACKAGE

To qualify for the Platinum Package rebate, the new home must have both the blower door and duct blaster tests conducted and must pass the 2009 I.E.C. air tightness test standards.* The builder must also provide a copy of the Certificate of Occupancy, sign the New Homes Participation Agreement, and complete a questionnaire about the home at verification time. The first blower door and duct blaster tests are free of charge; additional testing will reduce the rebate by \$200 per test.

- P1) Dual Fuel with Electric Water Heater** \$1,200 rebate
- P2) Dual Fuel \$1,100 rebate
- P3) Heat Pump with Electric Water Heater** \$900 rebate
- P4) Heat Pump \$800 rebate

STANDARD PACKAGE (code home)

To qualify under the Standard Package rebate, DREMC requires a signed New Homes Participation Agreement, a copy of the Certificate of Occupancy, and a completed questionnaire about the home at verification time.

- S1) Dual Fuel with Electric Water Heater** \$800 rebate
- S2) Dual Fuel \$700 rebate
- S3) Heat Pump with Electric Water Heater** \$500 rebate
- S4) Heat Pump \$400 rebate

* The home scores between 7 and 4 A.C.H. on the blower door test and less than 8% of duct leakage to the outside on the duct blaster test.

** Instantaneous water heaters are not allowed per TVA guidelines.
