# Downloading DREMC's Mobile App
## EASY STEP-BY-STEP GUIDE*

Before you download DREMC's mobile app, register your account first through our website using a desktop or laptop computer; go to dremc.com/my-account, select LOG IN and click on NEW USER. Use your DREMC account number and create a password. Fill in your information, including your mobile number. When you download our mobile app, DREMCmobile, you'll have quick and easy access!

Click on the app store icon.

Click on the search button at the bottom of the screen.

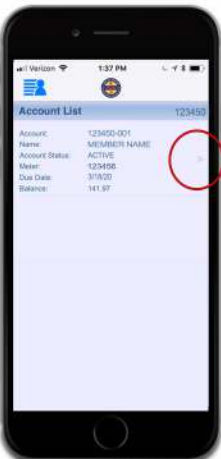

Type DREMCmobile in the search bar.

The DREMC mobile app will download to your device.

Open the app to enter your account number and password you created online. *(See above.)*

You'll be able to see your account information by selecting the small, gray arrow at right.

You can view many things about your account using the left menu tab.

With your advanced meter, you can view daily electric use under the usage graphs, receive daily energy use alerts via text and/or email and set other alerts and reminders for your account, including outage alerts, billing due date reminders and more.

From DREMC's website online billing portal, you can also access features like daily electric use, high and low temperature data along with degree day calculations to help you understand what contributes to your monthly electric bill.

From the online payment portal, you can also access other energy-saving tools, like the Energy Resource Center, on DREMC's website to help lower your bill.

*These directions are based on Apple iPhone, but Android phone and other mobile devices are easily adapted to these steps.
